

# ATI Visio Stencils: Setting the Correct Scale

Allied Telesis Visio stencils are designed and saved with a custom drawing scale of 1 in: 1 ft. The separation of a Visio image is caused by the improper scale setting in the drawing page.

Always configure the drawing scale when you create a new drawing page for your project so that you can resize the drawing and keep all the objects in proper scale.

Here is how you customize the scale in Page Setup:

1. Right-click on the Page in the lower left-hand corner of the Visio window and select Page Setup. The Page Setup window will be displayed.

2. Select the Drawing Scale -> Custom Scale field and change it from **1 in. : 1 in.** to **1 in. : 1 ft.** as shown in the figure above.
3. Click OK.

You are now ready to use all of the ATI generated Visio files on your drawing page.
